

INDIANA FLOOD CONTROL AND WATER RESOURCES COMMISSION

Indianapolis, Indiana

Revised and re-issued by the  
INDIANA DEPARTMENT OF NATURAL RESOURCES  
DIVISION OF WATER  
1999/2000

BENCH MARK DESCRIPTIONS  
**Allen County**

The fieldwork was done by the Indiana Flood Control and Water Resources Commission. All level lines were started from and closed on either First or Second Order bench marks established by the

U.S. Coast and Geodetic Survey.

DATUM:

Elevations given in this list have been determined from standard elevations of U.S.C. & G.S. bench marks, based on the Sea-level Datum of 1929.

This datum is now named the National Geodetic Vertical Datum of 1929

**NGVD 1929**

INDIANA DEPARTMENT OF NATURAL RESOURCES  
Division of Water  
Allen County

June 30, 1998

The following elevations were determined during August, September, and October 1955, by leveling between U.S. Coast and Geodetic Survey benchmarks along the Maumee River, the St. Mary's River, and the St. Joseph River. The Maumee River line runs eastward and northeastward from the confluence of the St. Mary's River with the St. Joseph River to form the Maumee River inside the city limits of Fort Wayne, to the Indiana-Ohio State Line near Antwerp, Paulding County, Ohio. The St. Mary's River line runs generally southeastward from the confluence of the St. Mary's River with the St. Joseph River, to the Allen-Adams County Line southeast of Poe, Allen County. The St. Joseph River line runs from the confluence of the St. Joseph River with the St. Mary's River, to the Allen-DeKalb County Line northeast of Hursh, Allen County.

Second order levels were run by the three-wire method using invar steel, yard roads. All level circuits closed within allowable limits for second order leveling.

All levels were adjusted to agree with the standard elevations of bench marks as published by the U.S. Coast and Geodetic Survey whenever the adjustments required was within second order limits between consecutive USC & GS bench marks. All elevations are based on USC & GS standard (adjusted) elevations for the following marks: C 15, D 15, E 15, X 22, Y 22, Z 22, G 199, J 199, T 200, V 200, P 201, Q 201, T 201, V 201, W 201, C 222 RESET, B 222, ISHC BM Allen F1, and ISHC BM H 199 in Allen County; D 221, S 224, and ISHC BM E 221 in Adams County; A 199, B 199, D 199, E 199, P 199, Q 199, A 201, and ISHC BM in DeKalb County; and M 126 in Van Wert County, Ohio.

ALLEN COUNTY

August 1960

The following elevations were determined during September 1959 and August 1960 by closed circuit leveling along the St. Mary's River in the vicinity of the Stellhorn Bridge at Ft. Wayne, Indiana.

Second order level were run by the three-wire method using invar-steel yard rods. All level circuits closed within allowable limits for second order leveling.

All levels were adjusted to agree with the standard elevations of benchmarks as published by the U. S. Coast and Geodetic Survey and the Indiana Flood Control and Water Resources Commission. The following elevations are based on the published elevations of TBM SM 16 and BM AL 12, pages 12 and 11 respectively of the Indiana Flood Control and Water Resources Commission Allen County Bench Mark listing published January 1, 1957.

The following marks will be destroyed when the replacement of the Stellhorn Bridge over the St. Mary's River has been completed: TBM SM 16 and BM AL 12, pages 11 and 10 respectively of Allen County Bench Mark listing.

**IFC&WRC TBM STELLHORN 1**

In Allen County, Ft. Wayne West Quad., in the SE ¼ of Section 26, T. 30 N., R. 12 E., 2<sup>nd</sup> PM.; at Ft. Wayne; at the Stellhorn Bridge over the St. Mary's River; 135 feet east along Tillman Road (Fairfield Avenue) from the extended centerline of Kinerk Road to a 1-foot pipe culvert under the road; set in the top of the south headwall of the culvert, 17 feet south of the centerline of the road, 0.5 foot east from the west end of the headwall; a chiseled square.

**ALLEN COUNTY**

October 1961

The following elevations were determined during October 1961, by leveling between U. S. Coast and Geodetic Survey benchmarks along the Little (Wabash) River. The level line follows generally upstream from the west county line to its head at the southwest edge of Ft. Wayne. The listing of the marks follow in order upstream along the Little (Wabash) River, with listing of other marks by streams at the end.

Second order levels were run by the three-wire method using invar-steel yard rods. All level circuits closed within allowable limits for second order leveling.

All levels were adjusted to agree with the standard elevations of bench marks as published by the U. S. Coast and Geodetic Survey whenever the adjustment required was within second order limits between published marks. All elevations in this line are based on the standard elevations for the following marks: USC&GS BM E 189, B 190, Waynedale and Waynedale Azimuth all in Allen County.

Allen County

ALLEN COUNTY

The following elevations were determined during October 1961, by closed circuit leveling from a U. S. Coast and Geodetic Survey benchmark along Junk Ditch. The level line follows generally upstream along Junk Ditch. The listing of the marks follow in order upstream along Junk Ditch.

Second order levels were run by the three-wire method using invar-steel yard rods. All level circuits closed within allowable limits for second order leveling.

All levels were adjusted to agree with the standard elevations of bench marks as published by the U. S. Coast and Geodetic Survey whenever the adjustment required was within second order limits between published marks. All elevations in this line are based on the standard elevations for the following mark: USC&GS BM C 15 in Allen County.

**IFC&WRC BM# 22**

In Allen County, Fort Wayne West Quad., in the NW ¼ of Section 10, T. 30 N., R. 11 E., 2<sup>nd</sup> PM.; at Fort Wayne; at Swinney Park; set in the north side of 52-inch tree, on the south bank of Junk Ditch about midway between the mouth and the first bridge (do not include the foot bridge) over Junk Ditch, 110 feet southeast of the centerline of the wooden foot bridge, 33 feet south of the south bank of Junk Ditch, 0.7 foot above the ground; a boat spike.
